- III. FINANCIAL PERFORMANCE
- IV. SUSTAINABILITY

COMPANY PROFILE

Sabaf Group: product range evolution in 4 Business Units

SINCE 1950

GAS

- Standard Burners
- Special Burners
- Professional Burners
- Oven and Grill Burners
- Gas Valves
- Gas Oven Thermostats
- Microswitches & Accessories

SINCE 2018

ELECTRONICS

- Cooker Hoods
- Ovens
- Cookers and hobs
- Vitroceramic hobs control cards
- Refrigerators/freezers
- Other products

SINCE 2000, further expansion since 2019

HINGES

- Ovens
- Dishwashers
- Washing machines
- Refrigerators
- Special applications
- Small compartments
- Catering appliances

SINCE 2022

INDUCTION

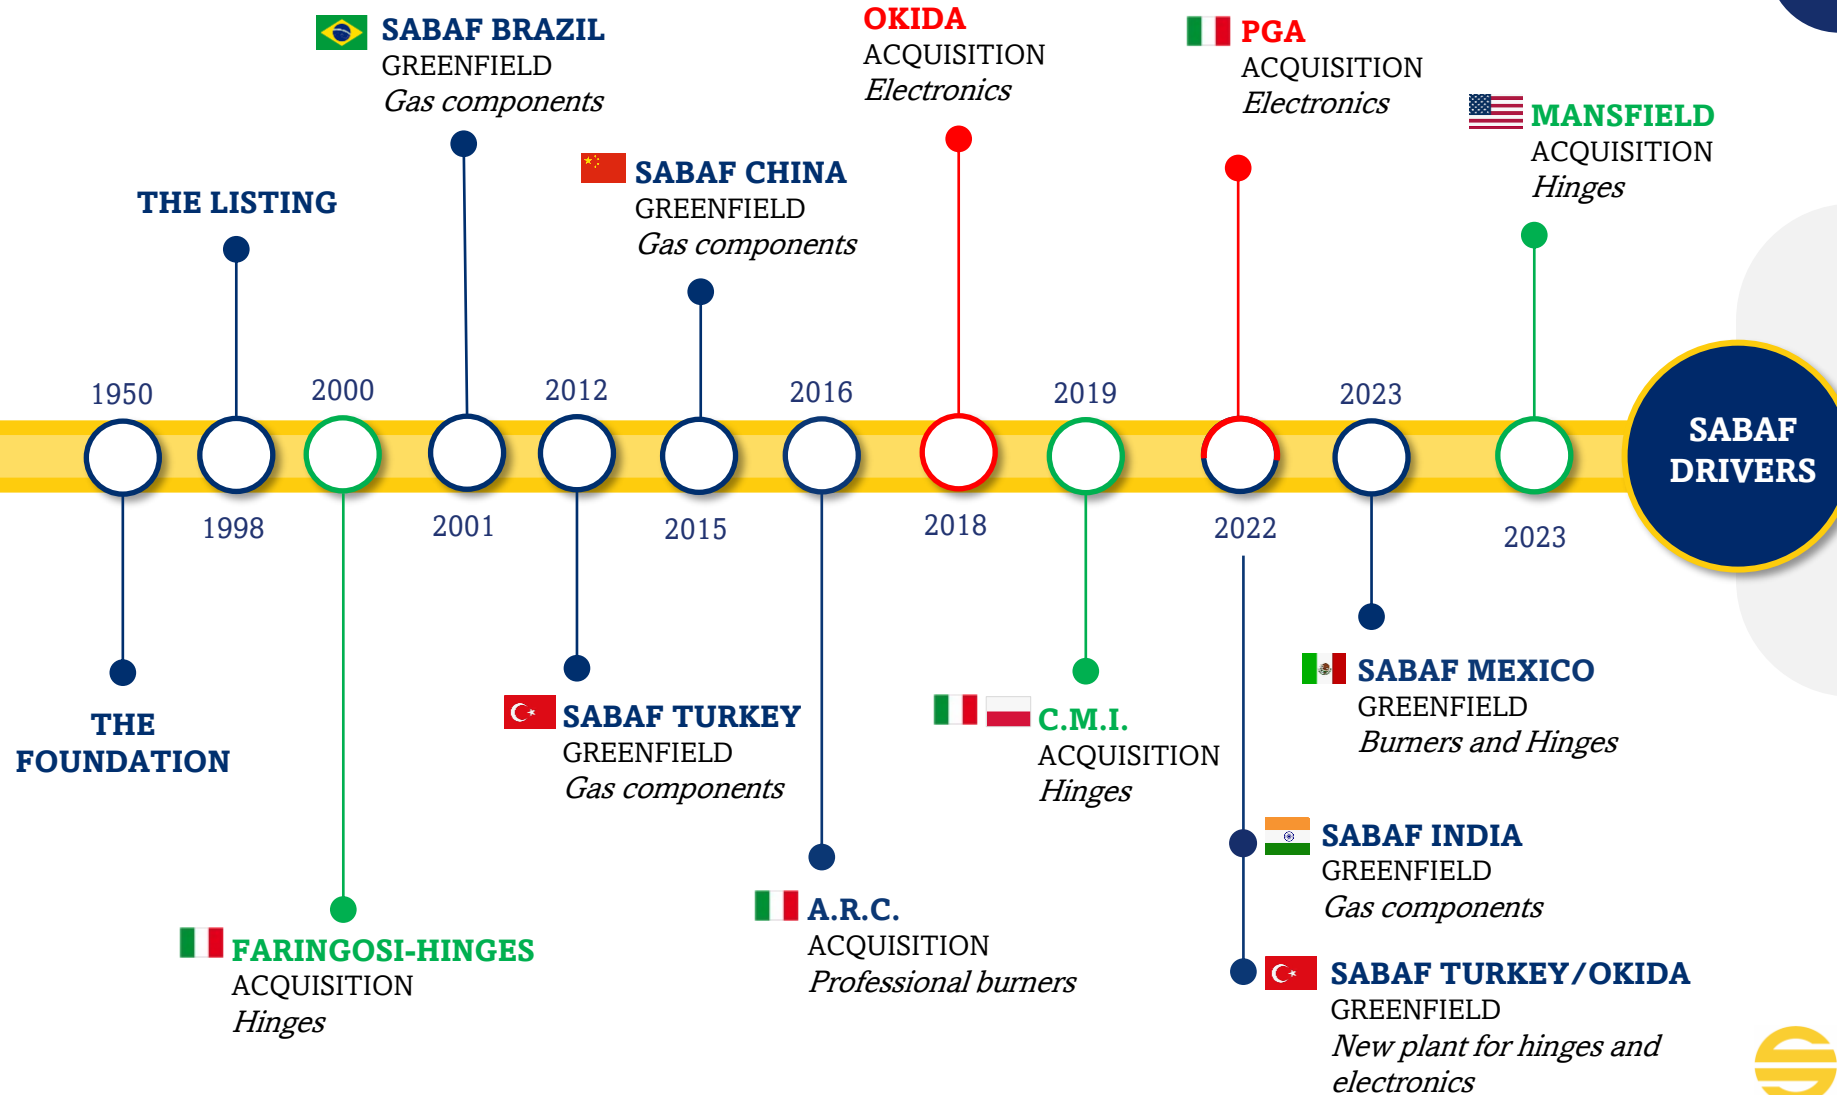

Components for induction cookers and hobs

- Inductor
- Power board
- Cooling system
- Touch control
- User interface

Sabaf Group: evolution

5 acquisitions in the last 8 years
3 greenfield plants in the last 3 years

- TECHNOLOGICAL
- SMART
- DIVERSIFIED
- GLOBAL
- SUSTAINABLE

Sabaf Group: leading producer of components for household appliances and company evolution in 4 Business Units

Sabaf Group: industrial footprint

- 2021: 10 production plants
- 2024: 15 production plants (6 in Italy and 9 abroad)
- 1,780 employees at 30 September 2024

SABAF S.P.A.
Valves and thermostats
Standard burners
Special burners

ARC S.R.L.
Professional burners

FARINGOSI-HINGES S.R.L.
Oven hinges
Dishwasher hinges

CMI ITALY (2 PLANTS)
Oven hinges
Dishwasher hinges

PGA
Electronics for household appliances

MANSFIELD
Oven hinges
Washing machines hinges
Refrigerators hinges

SABAF MEXICO
Burners

CMI POLAND
Dishwasher hinges

SABAF BRASIL
Standard burners
Special burners

SABAF TURKEY (2 PLANTS)
Burners, valves, hinges
and Electronics

OKIDA ELEKTRONIK
Electronics for household appliances

SABAF APPLIANCE COMPONENTS (KUNSHAN)
Wok burners

SABAF INDIA
Valves and burners

Why investing in Sabaf

Strategy for value creation

Sabaf Group

Main shareholders

% OF SHARE CAPITAL

18.18 %	Quaestio SGR
17.86 %	Cinzia Saleri S.a.p.A.
9.73 %	Montinvest S.r.l.
7.08 %	Fintel S.r.l.
4.50 %	Paloma Rheem Investments

29.88 %	Market

Pietro Iotti, Sabaf CEO,
owns 2.18% of voting rights

LATEST STRATEGIC MOVES

Latest strategic moves

Sabaf India

Sales start	2Q 2023
Investment	€ 5.2 million in 3 years
Division	<u>Gas</u> : production of valves and burners for the domestic market
Production capacity	€ 6 million (scalable)

Market characterized by:

- **strong growth**
- **customization**
- **competitive price requests**

• **9M 2024**: revenues € 1.5 million

• **4Q 2024**: expected revenues € 0.9 million → **strong sales ramp-up**

Completion of the **entire production process of valves** by 1H 2025

Sabaf Mexico

Sales start	1H 2024
Investment	€ 12 million in 2021-2023
Division	<u>Gas</u> : production of burners for NA market
Production capacity	€ 9 million (scalable)

May 2024: start of sales to **Mabe**

July 2024: start of sales to **Whirlpool**

Fast production ramp-up, working on 3 shifts

- **9M 2024**: revenues € 1.5 million
- **4Q 2024**: expected revenues € 1.2 million

Budget 2025: revenues € 7 million

Mansfield acquisition

Acquisition	July 2023
Share acquired	51% of share capital
Enterprise value	USD 21 million
Division	<u>Hinges</u>

Mansfield Engineered Components LLC (MEC) is **based in Mansfield, Ohio**

MEC is a **leading North American manufacturer of hinges** for household appliances (mainly ovens, washing machines and refrigerators), designed and manufactured to meet the high-quality levels and demanding standards required by the US market

Smooth transition from previous ownership to the management

Visible synergies, for which implementation is ongoing, even thanks to very **positive relationships** with local management

Ongoing **automation** in order to improve productivity

9M 2024

- **Revenues** USD 21.8 million
- Despite market weakness, **profitability is steadily improving**

4Q 2024: expected revenues USD 6.7 million

Sabaf Induction

Project start	2021
Sales start	1H 2024
Investment	About €5 million in R&D in the period 2021 – 2023

Sabaf has developed **its own project know-how** (proprietary patents, software and hardware)

Creation of **innovative products** which better meet manufacturers' needs and new consumer trends. The project flexibility will enable Sabaf to offer **customised products** to its clients

The Group benefits from the expertise gained from the acquisitions of **Okida and P.G.A.** where part of the induction cooking components are produced

Team of **more than 60 electronic engineers**

Q2 2024: one of the major multinational groups started to produce under Sabaf license

Q3 2024: delivery of samples to 9 customers for testing

Q4 2024 and **Q1 2025:** expected start of sales to many customers

FINANCIAL PERFORMANCE

Context analysis

Customers

- **Greater penetration of Turkish and Chinese players in the European market**
 - Arcelik with WHP EMEA (now Beko Europe)
 - Haier with Candy acquisition
 - Hisense with Gorenje acquisition
 - Midea with Teka acquisition
- Weakening of the historical Western players
- Reduction in end-users purchasing power

The **Sabaf Group** thanks to its

- **global footprint**
- **strong relationships with key market players**

is able to **take full advantage** of such trends

Competitors

The last 2 years highlighted the **difficulty with resilience of some competitors**, which could open opportunities for **M&A and/or market share increase**

Market trends

Europe

- After several quarters characterized by **market weakness, the first signs of recovery are emerging**

Quarterly industry shipments in Europe

Quarterly unit comparison y-o-y

Source: Electrolux 3Q 2024 presentation

North America

- **2Q and 3Q 2024 industry shipments were positive (+5%).** Market was driven by **solid replacement demand**, partially offset by **weak discretionary purchases**. Price/mix is negative.

Quarterly industry shipments in U.S.

Quarterly unit comparison y-o-y

Source: Electrolux 3Q 2024 presentation

- **Strong growth in Latin America**
- **Asia is recovering** compared to 2023
- **Middle East** and **Africa** performed well, but still affected by the **geopolitical** picture

9 MONTHS 2024 | Sabaf Group highlights

In this context
Sabaf reported strong results

- Direct presence in **emerging countries**
 - **Product range expansion**
 - Product **innovation**
- allow the Group to **gain market share** and **outperform the market**

Thanks to its **global industrial footprint** and **available production capacity**, Sabaf is **ready to respond to the expected recovery** after a period of market weakness

	3Q 2024	9M 2024

Cash at the end of the period	28,273	36,353	25,576

Dividends: on 28 May 2024 distribution of a gross ordinary dividend of €0.54 per share

2024 Outlook

2024 Outlook

The Group expects to close **2024** with **revenues ranging from €276 to €280 million, up by 15-17%** compared to 2023. In recent weeks, the order intake has been influenced by the inventory reduction policy of major customers, which is typical at the end of the year.

In the coming months, potential more expansionary monetary policies could support the recovery of the housing sector in Europe and in the United States and thus the **recovery of the market for household appliances**.

In 2025, Sabaf will continue to implement its Business Plan, which aims to **increase and consolidate its global market shares**, through

- the increasingly **widespread presence** of the Group at a global level
- the **diversification** of product offering
- the enhancement of the **synergies** with acquired companies
- the growth through **acquisitions**.

Notably, an increasing contribution is expected from the **Gas division**, thanks also to the **new plants** in Mexico and India, from the Induction division and from the **direct presence in the United States** (thanks to the recent acquisition of MEC).

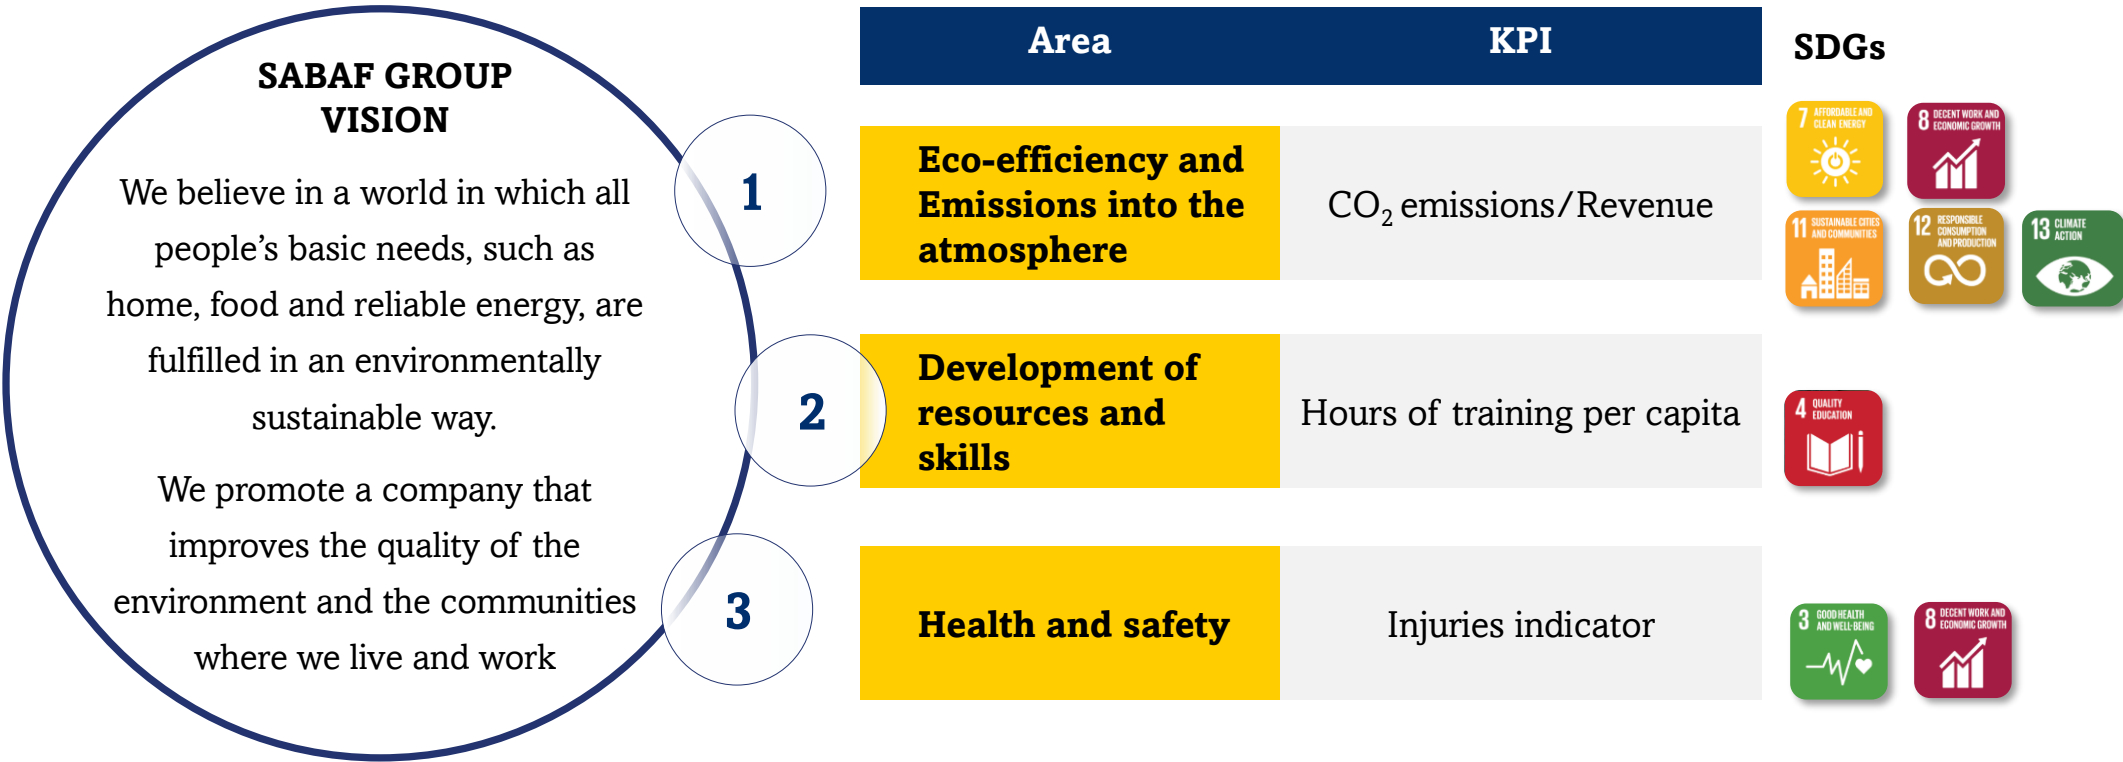

SUSTAINABILITY

Sabaf: a sustainable business

Sustainability in the Business plan 2024 - 2026

“ Sabaf’s strategy and governance model are aimed towards ensuring long-term sustainable growth.

For Sabaf, sustainability is primarily based on sharing values with its stakeholders; compliance with common values increases mutual trust and encourages knowledge development ”

ESG Performance - Corporate Governance

Remuneration policy

LONG - TERM INCENTIVE PLAN
2024 - 2026

Linked to the economic-financial and sustainability objectives set out in the **2024-2026 Business plan**

- Definition of **SUSTAINABILITY TARGETS:**
- With reference to the issues highlighted in the **materiality analysis**
 - Fully in line with **best practices** and **Corporate Governance Code**

MATERIAL TOPIC	KPI	% ON LTI
Emissions into the atmosphere	Implementation of the ESG investment plan (1,500 t CO ₂ reduction)	10%
Development of resources and skills	Hours of training per capita	5%
Health and safety of personnel	Indicator of injuries	5%
Impact of on LTI plan		20%

Environmental impact of different cooking fuels 1 / 3

About 30% of people on our planet, i.e. 2.5 billion people, are still relies on **solid biomass fuels** for cooking (wood, charcoal, animal dung, crop residues)

This population is mainly concentrated in Sub-Saharan Africa, where the unavailability of clean fuels affects 82% of the population, but significant percentages characterize also Central Asia, India, China, South-East Asia and Latin America

In addition to being **harmful to the environment**, the pollution produced by traditional fuels has important consequences on the **health** of users and families

5.5 billion people use fossil fuels (mainly natural gas and LPG) or electricity for cooking

Environmental impact of different cooking fuels 2/3

Environmental impact of different cooking fuels¹

The environmental impact was measured using a **scientific standard method** (the ReCiPE 2016), which is based on 3 impact categories:

- damage to human health
- damage to ecosystem quality
- damage to resource availability

The environmental impact **was highest in the case of coal** cooking appliances (112) and **lowest for LPG and methane** cooking appliances (5 and 5.2 respectively).

Electric cooking appliances, with an impact of 9, highlighted an environmental impact equal to **180% of** that deriving from **gas** hobs

Cooking through a gas hob instead of using firewood as cooking fuel, **reduces the environmental impact by 80%**

¹ <https://www.itjfs.com/index.php/ijfs/article/view/2170>

Italian Journal of Food Science, 2022 – Environmental impact of the main household cooking systems – A survey, 2022 Alessio Cimini and Mauro Moresi, Università della Tuscia

Environmental impact of different cooking fuels 3/3

From the perspective of sustainable development, the **reduction of the environmental impact** resulting from cooking food will necessarily have to go through a **dual strategy**

Promote access to **energy sources with lower impact** for the population that still uses solid fuels

Favor electric cooking only where and when **the energy production mix** is characterized by a predominant component of **green energy**

An induction hob causes lower CO₂ emissions than a gas hob only if the electricity is produced with a % of **renewable sources** (and/or nuclear energy) **higher than 70%**

The Sabaf Group pursue **a business development path consistent with the ecological transition plans:**

- Sabaf is investing to promote diffusion of gas cooking appliances in emerging countries, replacing traditional cooking methods with much higher environmental impact
- At the same time, Sabaf is investing to enter the sector of induction cooking, the most efficient form of electric cooking, which is constantly growing in the European market, although such trend has slowed down in the last 3 years

A possible revolution - Hydrogen burners

The Sabaf Group actively takes part in research projects aimed at evaluating the feasibility of replacing natural gas (methane) with hydrogen as a source for gas cooking appliances

Burners operating with 100% hydrogen: laboratory tests and prototypes have confirmed the technical feasibility of these products

The possibility to use hydrogen on a large scale as a fuel has still to overcome important technological challenges, both in terms of its production and distribution

A possible solution in a relatively short time is the use of a **mix of methane and hydrogen**, through the **existing distribution network**

Hy4Heat project, promoted by the British government, concluded in 2022 with positive results

Pilot project in collaboration with the Colombian client Industrias Haceb → **European Union Sustainability certification LCBA** (Low Carbon and Circular Economy Business Action)

DISCLAIMER

Certain information included in this document is forward looking and is subject to important risks and uncertainties that could cause actual results to differ materially.

The Company's business is in the domestic appliance industry and its outlook is predominantly based on its interpretation of what it considers to be the key economic factors affecting this business. Forward-looking statements with regard to the Group's business involve a number of important factors that are subject to change, including: the many interrelated factors that affect consumer confidence and worldwide demand for durable goods; general economic conditions in the Group's markets; actions of competitors; commodity prices; interest rates and currency exchange rates; political and civil unrest; and other risks and uncertainties.

Pursuant to Article 154/2, paragraph 2 of the Italian Consolidated Finance Act (Testo Unico della Finanza), the company's Financial Reporting Officer Gianluca Beschi declares that the financial disclosure contained in this financial presentation corresponds to the company's records, books and accounting entries.
